We again call attention to the old ruins across the street from the MINER office. Something should be done with them. They are a disgrace to our town and a constant eyesore to all live business men. They should be utilized for some purpose or else torn down.

It is feared he will not recover.

He has opened a little store at that place and keeps a general stock of merchandise, supplies for families and miners and a line of calico goods and awails, handkerchiefs, beads and all kinds of merchandise especially adapted for the Indian trade of which he says is quite an item at that place.

Pneumonia is assuming an alarming form in the town of White Hills, several deaths having been reported from this cause during the past few weeks, and quite a number are now down with the fatal malady. It is thought that the prevalence of the disease is caused by the use of impure water. Moral—don't drink water and you will probably escape its clutches. It is said that quite a number of persons at White Hills have adopted this method and are absolutely pneumonia-proof.

As we go to press information is received of the death of A. Manvell, President of the Santa Fe system, yesterday morning at the Coronado Hotel, San Diego. We were unable to learn the malady which caused his death. By his demise the Santa Fe loses one of its brightest members and his loss will be keenly felt in railroad circles.

A little Wallapai Indian at Peach Springs Thursday, while playing around the cars in the yard at that place, got his hand pretty badly mashed. The switch engine was moving some cars and the little fellow's hand got caught in the car coupler, breaking three of his fingers and it is probable that his hand will have to be amputated. He was brought to Kingman and the doctor dressed the wounded member and made the little sufferer as comfortable as possible. It is a mystery that more Indian children do not get hurt or killed by the cars as they are eternally jumping on and off moving trains at this and other points along the line of the road.

Louis Delmas, a Frenchman, came in on the stage from White Hills Thursday suffering with pneumonia. He was taken to the Commercial lodging house, but, growing rapidly worse, it was deemed advisable to remove him to the hospital where a room with a stove in it could be procured. This was done, but the unfortunate man was beyond human aid. He died at 2 o'clock yesterday morning and was buried to-day. The deceased is a stranger in this section and very little information can be obtained regarding his friends or relatives. It is thought he is known at Flagstaff, having come from that place a short time ago, since which time he has been mining in Indian Secret district.

Everyone present had a lovely time and the party broke up along in the wee sma' hours of the morning.

The latest fish story comes from Rioville, Nev. A couple of young men on horseback and another in enormous gum boots comprised the fishing party. The two horsemen proceeded up the Virgin river several hundred yards leaving their companion stationed in the middle of the stream with a large barley sack, the mouth of the sack (not the man) being distended a foot or so under water. The boys on horseback rounded up a school of salmon and drove them slowly down stream into the sack held by the man below. They caught several sackfuls in a short time. We have heard of snipe hunters using this method, but had no idea that fish could be captured in the same manner. Next!

The Wells, Fargo & Co's express has presented each of its agents with one of the World's Fair Columbian half dollars as a souvenir. The coin is fitted in the center of a piece of heavy cardboard, on one side of which is printed: "Columbian Souvenir Coin, 1893. Commemoration of the World's Fair Columbian Exposition at Chicago, Ill., A. D. 1893. Presented to the employees of Wells, Fargo & Company." On the other side is, "A Keepsake from Wells, Fargo and Company, in Token of Regard and in Appreciation of Faithful Service" with the signature of the President, John J. Valentine. The card is enclosed in a natty little envelope with the agent's name and postoffice address, and compliments of W. F. & Co., printed thereon. Such a pleasing token would be very acceptable to any one and we almost envy those fortunate agents their souvenirs, which, by the way, cost the company something like eight thousand dollars for the coins alone, besides the printing and other labor connected with getting them out.

Owing to an accident at Laguna Tuesday, in which seven carloads of oranges were wrecked, the west bound passenger due here at 5:30 p. m. Wednesday, did not arrive until Thursday afternoon. Malcolm McLeish, who was on the delayed train, says the passengers were obliged to purchase coffee and Tortillas from the Laguna Indians to keep from starving to death.

The ring and knife game has been replaced by one which seems to catch more "suckers" than its predecessor. It consists of a table with an iron cross bar revolving on a pivot and articles of jewelry, money, chains, watches, etc., etc., distributed around the table. The articles over which the bar rests when stationary is the one you win, and it is a surprising fact that it never stops at an article of any value although quite a number of articles are in sight which would be a good investment for one's money should he prove successful in getting the bar to stop at the article of worth. The Indians are the biggest "suckers" for the smooth operator.

Another Wedding.

It is with pleasure we announce this week the marriage of our genial young friend, Asa Harris, of Kingman, to Miss Libbie Wilson, of Lodi, California, the event occurring Sunday, Feb. 10th at the residence of the bride's parents. Both the high contracting parties are well and favorably known in this section, the bride being a former resident and the groom has lived among us for the past six years. The couple arrived from California last night and have taken rooms for the present at Mrs. Ed. Harrington's, opposite the depot, and congratulations are now in order. The MINER wishes the happy couple long life and prosperity in their journey through life; may their pathway be strewn so thickly with roses, that the thorns will never become apparent.

John Derr, cutter for Elliott & Co., merchant tailors of Flagstaff, is in town this week with a line of samples the equal of which have not been seen in Kingman for many a long day. His prices are reasonable and we advise our citizens to purchase their spring clothing from him and patronize home industry. His prices are equal to the California prices for suits and it is a well known fact that a finer cutter does not travel on the road.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address,
